

NAILS IN EVERYTHING - concrete, steel, stone wood...

the powerful PREBENA pneumatic battery nailer with PKT-HYBRID technology!

The PREBENA concrete nailer PKT-8-RHC40 is the new power tool for direct installation. It processes magazine nails up to 40 mm without any problems, even in solid surfaces such as concrete and steel. For the user, this results in an enormous time advantage and a high degree of flexibility compared to conventional fastening processes that require drilling, cleaning and dowelling.

The innovative PKT-HYBRID technology gives the new nailer enormous impact power and independence from a permanently installed power source. It works with PREBENA PKT technology in combination with an 18 V LiHD high-performance battery from the Cordless Alliance System (CAS).

The PREBENA PKT-8-RHC40 is "Made in Germany" and can be used in a wide variety of trades. In dry construction, this includes the fastening of U-profiles for lightweight walls. Formwork stops and reinforcement holders are nailed in formwork construction. In metal construction, profiles and sheets can be fastened to steel structures. Cable holders, cable ducts or pipe clamps can also be fastened securely and quickly to various substrates such as steel, concrete and masonry in the electrical and plumbing trades to facilitate the installation of cables and pipes.

PREBENA has developed the concrete nailer for use on construction sites. Due to the compact design and the enormous impact force, one-handed operation is no problem. Depth adjustment and empty shot protection are standard.

The concrete nailer includes the new PREBENA type RHC nails from 15 - 40 mm. The high-quality nails have a ballistic point and are suitable for the heaviest substrates.

The PREBENA PKT-HYBRID technology currently consists of three different pneumatic battery nailers. In addition to the concrete nailer, PREBENA offers a nailer for round-head strip nails and a nailer for half-head strip nails up to 100 mm.

CAS (Cordless Alliance System) – One battery many solutions

CAS brings together a wide variety of manufacturers from different sectors under one "battery roof": Within the system, tools, machines, chargers and battery packs are 100% compatible and can be combined in any way. More than 300 powerful battery products are available in the 18 volt class.

Based on the powerful Metabo LiHD battery technology, CAS brings together the most diverse trades under one roof and thus offers professional users the freedom to work with standard and special products from various manufacturers in a mobile and flexible manner, far away from the power socket. More about CAS at www.cordless-alliance-system.com.
